

Primed Online 'offline' period

Primed Online will be closed from the 23rd December, 2011 and re-open 3rd January, 2012.

For all urgent support requests during this time please call (+613) 9532-0392

Merry Christmas from Primed Online!

Rob's Desk - Managing Director

From the Managing Director's desk:

November has been a very busy month with a new client joining the PulseGroup, numerous interstate visits for presentations, proposals and workshops. We are very pleased to welcome Cairns Regional Council into the PulseGroup and excited about the way they have taken up our products into their business. We have assisted HealthCo launch their new look company after their merger across three states by giving presentations on HealthMonitor™ to their large supplier base. We are providing the underlying technology for their joint venture to deliver data warehouse reporting capability to more than 450 suppliers across the continent in a Cloud based architecture. This new capability

has never been attempted in their industry before and has created quite a stir of excitement so much so it may rapidly go international next year. Should be exciting!

Merry Christmas everyone! Look forward to seeing you all in the New year!

Mary's Desk - General Manager (POLA)

What a whirlwind month! Training, Training and more Training!

The Academy at Primed Online heavily uses Webinar and E-Learning facilities which allow us to cater to all of our National Clients. We bring the Academy to your board room through our cloud based software and applications.

I look forward to working with you all to provide mentoring and training on our software solutions to ensure the product fits into your

organisation and suits and enhances each and every job role. We take the stress out of setting up business rules and workflows and facilitate effective workshops

The Academy is also in the midst of rolling out ITIL. We have successfully rolled out the following components throughout our organisation: Service Request, Management, Release Management and Training Management.

Have a safe and happy holiday, and let's gear up for some excellent training and development in 2012!

Fun News for the month

This month all of Primed Online enjoyed lunch together at a local restaurant. Apart from the fact that we must all be in 'sync' for inadvertently ordering the same entrees, we all also really enjoy getting together and socialising 'outside' of the work environment.

In other news, Venkat, our Software Development Manager celebrated his birthday this month and we surprised him with an absolutely decadent chocolate mud cake. Happy Birthday Venkat!

Final Thoughts...
